

PROJECT MANAGER

Eastern Maine Healthcare Systems in Brewer, Maine is looking for a full time Project Manager.

The Project Manager candidate will be involved in a very complex program to comply with ICD10 and HIPAA Privacy requirements for all Member organizations. This includes the inventory of systems to assess their readiness, planning remediation, and the actual system upgrade or replacement activities necessary for compliance. The complexity and scale of this project along with very tight deadlines makes it a wonderful challenge for professionals with project management experience.

The Project Manager will work collaboratively on a team and will lead and direct projects using established methodology. This position requires the meeting of complex and exacting deadlines with minimal oversight.

Education Required:

- A Bachelor's degree from four-year college or university in management information systems, healthcare administration, a healthcare discipline such as nursing or laboratory technology, business, or related field; or equivalent related experience required.
- A graduate degree or PMI Project Management Professional (PMP) a plus.

Experience Required:

- Successful applicants have a minimum of two years comparable project management experience in large and complex projects.
- Must have reliable transportation and be willing to travel throughout Maine.
- Must be able to occasionally work variable hours and weekends.
